

TRANSFORMING TECHNOLOGY RECYCLING PROGRAM

NAID and R2V3 Certified
Equipment Recycling and Refurbishing

Donate your used computer equipment to support digital equity

With the belief that digital inclusion and environmental sustainability go hand in hand, Minnesota Tech for Success recycles and repairs donated computers to refurbish them for schools and educationally focused community organizations to impact the full life cycle of technology.

For businesses that want to donate their used technology to help create digital equity, our NAID and R2V3 certified computer donation program transforms used equipment while adhering to the highest industry standards of data security and recycling.

"We believe education is the avenue through which all children can succeed. By putting quality equipment into the homes of children, MTFs helps level the playing field and gives every student a chance to reach their potential regardless of socioeconomic status. We're proud to support their efforts!"
- Transforming Technology Recycling Program Donor

FREE AND EASY DISPOSAL

We happily offer free pick up from businesses and organizations for donations that include refurbishable equipment in the Twin Cities area.

SECURE DATA DESTRUCTION

We value the security of your data above all else. We are NAID certified and our rigorous security standards and procedures ensure your data is safe at all times, no matter what.

ENVIRONMENTAL CONSCIOUSNESS

With the motto of "Test, Repair, Reuse, Recycle," R2V3 is setting the standards for used electronics. We refurbish donated technology and reuse it to create digital equity while keeping it out of landfills.

DIGITAL EMPOWERMENT

Your donated equipment helps us place more technology in the hands of Minnesota students and individuals who want to invest in their future, giving them the tools and training to succeed.

HOW TO GET STARTED

Transform your technology to empower potential
