IT Certification Training and Workforce Development

HTML5 CSS Fundamentals: 9 week course

If you're interested in learning the tools used by industry professionals to develop websites and web apps, this is the class for you. We will cover HTML5, CSS, version control using GitHub, Visual Studio Code; and how to publish your website and make it live on Netlify. Each student will build a website in this class. Free onsite daycare is available for students with children (provided by Neighborhood House). **Location**: Neighborhood House; 179 Robie St East, St Paul, MN 55107

CompTIA A+ Certification: 2-14 week course

CompTIA A+ is the industry standard for establishing a career in IT and is the preferred qualifying credential for technical support and IT operational roles. It is about much more than PC repair. Candidates are better prepared to troubleshoot and problem solve, and technicians better understand a wide variety of issues ranging from networking and operating systems to mobile devices and security. A+ supports the ability to connect users to the data they need to do their jobs regardless of the devices being used. **Virtual class.**

CompTIA Network+ Certification: 2-14 week course

CompTIA Network+ helps develop a career in IT infrastructure by covering troubleshooting, configuring, and managing networks. This certification validates the hands-on skills needed to work with both wired and wireless networks; also included are emerging technologies such as unified communications, mobile, cloud, and virtualization technologies. This powerful credential will help take your IT career to the next level. **Virtual class.**

CompTIA Security+ Certification: 2-14 week course

CompTIA Security+ is the first security certification IT professionals should earn. It establishes the core knowledge required of any cybersecurity role and provides a springboard to intermediate-level cybersecurity jobs. The certification emphasizes both the practical and hands-on ability to identify and address security threats, attacks and vulnerabilities. CompTIA Security+ is a globally trusted, vendor-neutral certification that validates the baseline skills necessary to perform core security functions and pursue an IT security career. **Virtual class.**

ABOUT MINNESOTA TECH FOR SUCCESS

Minnesota Tech for Success creates digital equity for students by providing technology access, engaging STEM programming, and IT workforce development.

ABOUT MTFS *Learn*
