

MnDOT-DEED

Highway Construction Cement Mason Local 633 JATC Training

PRE-APPRENTICE TRAINING FOR QUALIFIED INDIVIDUALS

CEMENT MASON TRAINING:

This 240-hour, 6-week course is designed to provide pre-apprentice highway construction training that prepares individuals for employment in the highway construction industry. This course includes a combination of curriculum-based classroom instruction, hands-on use of tools and equipment, videos and guidance from industry experts. Training is free for qualified individuals.

About MnDOT-DEED Highway Construction Training and Job Placement

- Gain knowledge and hands-on training at no cost to you
- Build a foundation for a future career as a journey-level construction trades person
- Employment preparation for qualified individuals

Our program provides, at no cost

- Highway construction training instruction and materials
- Work boots, PPE and construction tools
- Job placement assistance

Eligibility - you must:

- Have a high school diploma or GED
